

“SOME PEOPLE WONDER HOW
I CAN BE SO PASSIONATE
ABOUT AIRPLANES.

I’VE GOT EIGHT KIDS.

I’M PASSIONATE
ABOUT EVERYTHING”

—Mike Dwyer

That’s why the best experience you’ll ever have in a business aircraft has our name written all over it.

We’re creating a new kind of turbine aircraft support and sales company: One that focuses on helping people find answers and make connections with the expertise they need. So they can passionately enjoy the benefits of turbine aircraft ownership.

Yes, we do sell and broker airplanes. But aviation hardware is not our only focus. Our approach is to view client-focused Services and Consulting as the foundation from which sales and brokerage opportunities can naturally evolve.

If we do a great job of taking care of you as an owner, we believe we’ll

earn a fair shot at representing you as a buyer or seller.

After all, who’s better suited to maximize value for you at trade-up time than a company that’s solidly with you from beginning to end?

One phone call to Guardian Jet gives clients access to an incredible range of services and expertise. Everything from backup crews to maintenance oversight to insurance

and tax consulting to fuel discounts, route planning, air-to-air photography, and more—they’re all part of our GUARDIAN ECHELON MEMBERSHIP (GEM) package.

“Guardian Jet is your access point to business aviation’s most complete range of oversight, consulting and operational caregivers. We are your stewardship committee.”

A new paradigm? Absolutely. And we’d love to tell you more. So call us at (203)458-2500. Or visit our website: www.guardianjet.net
